DETAILED ACTION

Allowable Subject Matter

1. Claims 2, and 4-18 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose or suggest the methods of independent claims 2 & 4 which include, among other features, the steps of generating, grouping the codewords according to a predetermined run length condition(s), and allocating the codewords in a code stream such that a codeword for the source word controls suppression of DC components of the code stream. The prior art also does not disclose or suggest the method of independent claim 14 which includes the step of arranging the codewords disposed adjacent to each other to have different opposite polarities from each other, wherein the different opposite polarities represent one of an odd number and an even number of 1s in each codeword. And for claim 15, none of the prior art teaches/suggests a method in a run length limited coding system including, among other recited steps, a step of allocating the selected one of the codewords of the first group into the second code group to be arranged and connected to a codeword of the second code group having different INV polarity from the selected one of the codewords of the first code group. Because of the reasons above, the pending claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
